The Calling

Have you ever noticed the same struggles repeating over and over again in your life? Why do the same conflicts keep finding you in a new relationship, a new job, a new place? Maybe it's a pattern of insecurity around self-doubt, worth, or abilities? Why, when achievement finally arrives, does fulfillment never quite seem to come with it?

Most people spend years treating these as separate problems, solving each one as it appears, only to watch the next one show up wearing a different face. What if the pattern itself was never the problem, but a clue?

A Soul Contract reading hands you the blueprint underneath the repetition: the reason those patterns exist, the struggles you were meant to overcome, the lessons you were meant to master, all encoded within the letters of your name before you were born. Once you see the design, you stop simply being a passenger in your own life. You can bring awareness and intention to the patterns and start to transmute the struggles into a meaningful alignment with your very own life's purpose.

What is a Soul Contract

The founding premise of Soul Contract work is that before you were born, you chose this life, deliberately, down to the name that you carry. Encrypted within that name is the Plan your Soul chose for this incarnation, including your largest obstacles & lessons, your gifts & abilities, the underlying forces that drive you, and ultimately your life's purpose. This work exists to help provide you with a framework to put your life experiences into a different context and bring a level of understanding to them that you have not had access to before.

This system of soul-based numerology was channeled in 1980 by Frank Alper, working with the wisdom of Moses (which he termed "the Numerology of Moses") and the twenty-two letters of the ancient Hebrew alphabet. The same tradition was further explored and developed by Nicolas David Ngan in his book, Your Soul Contract Decoded. Its roots incorporate many principal elements of Kabbalah, the Tarot, and Astrology. It is a unique system of numerology (separate from Pythagorean) with its own interpretations and meanings. At the center of it sits the Star of David (a 2D Merkabah) with its six points, two triangles, reflecting one overarching life purpose.

A Primer for How the System Works

Each of the English letters of your birth name corresponds to a specific Hebrew Letter which in turn corresponds to a specific number. Each of those numbers carries a frequency, one your Soul selected before you took your first breath, before anyone told you who to become. Those numbers or frequencies are placed around the Star in a clockwise spiral. The sum at each point of the star is then reduced to a number that tells us exactly how that energy shows up in your life.

Six positions emerge from this, three physical, three spiritual, and together they sum to a seventh position held at the very center: your Soul Destiny, the truth or purpose everything else has been quietly orbiting.

DOMINANT VIBRATION 6

A frequency carried four or more times across the chart, so its themes recur throughout the reading.

6-6 Physical Karma

This is the primary lesson your soul has chosen for your physical life. These lessons often relate to unresolved issues from previous incarnations. The themes contained in your Physical Karma will most likely keep repeating until you become aware of them, learn their lesson and move to mastery.

People often experience their Physical Karmic energies most intensely in the first half of their life. These are generally related to the tangible aspects of one's life such as family, relationships, career, money, property, possessions, etc. Depending on where a person is on their development journey, they can feel very intense or heavy or may be something that they have already worked through on either a conscious or subconscious level.

This is often the heaviest energy in the chart, but it important to understand that it also has the capacity to become a doorway to your greatest gift once unlocked. The key is to first bring awareness to the pattern and acknowledge it not as a negative or insurmountable obstacle but instead as an experience that you chose to learn from. Bringing intention to meeting its themes and working through its lessons grants us the ability to transmute it into a positive force within our lives and a gift of service to the world.

NUMBER	6
HEBREW LETTER	Vuv
LETTER TYPE	Convertible Letter
KEYWORD(S)	Creativity
CATEGORY	Physical, Creative

This is where a simple idea/thought at the top of the knot, that one resonates with, is converted into its completed form. This is creativity in action.

ORGAN: RIGHT KIDNEY

The ability to discern and filter if something is your truth. Deciding what deserves to be let in.

ASTROLOGICAL SYMBOL: TAURUS

Practical and strong willed, with the possessive drive to hold onto what matters most. Out of balance this settles into stubbornness and a rigid, immovable will.

ACTION OF EXPRESSION: THOUGHT

All creation starts with a thought.

The 6 is Vuv, the letter of the number 6, and it holds the seed of creative power, the capacity to take a simple thought and transform it into its fullest expression, where all creation begins. It harbors the energy of manifestation. In its growing edge, this energy can show up as blocked expression, scattered focus, or difficulty completing what is begun. In its gift, it is an extraordinary force of creative will that, once channeled and trusted, can bring remarkable things into being. The art is learning to hold one thread all the way through to completion.

The symbol is a knot where a single idea at the top is converted into its completed form, creativity in action. Ruled by Taurus, the 6 brings practicality and a strong will, along with a possessive streak, though it can also meet stubbornness and rigidity. When there is a feeling of being disconnected from God, there may be a sense of frustration, a need for guaranteed success before taking a risk, or a tendency to keep many projects going without finishing them. Risk tends to feel even larger when the subject is intangible rather than concrete. Issues around blocked anger or addictive patterns can also present themselves with this energy.

When focus and trust come together, this energy becomes a vision that moves outward in many directions, illuminating and expanding ideas as it goes. It is naturally artistic, especially in the visual arts, and well suited to business because every action is carefully planned. The mind seeks expansion and concentrates deeply when it commits. Its gifts carry a feeling of complete free will, the freedom to create in any area one chooses, while its goals come with an added push from the soul level.

FREQUENCY ATTRIBUTES & CHARACTERISTICS

- Creativity, will, and focus are the core themes.
- Growth comes through choosing a few priorities and seeing them through.
- Small steps and visible progress build momentum and trust.
- Art, business, and creative projects are natural channels for the gift.

Physical Karma 6-6

- Difficulty using will and thought to achieve what is wanted, which stems from a feeling of being disconnected from God and may bring despondency or frustration.
- Blocked creativity and blocked expression of soul essence, sometimes alongside a strong desire for power.
- May feel isolated.
- Too many things going at once, difficulty completing them, and getting easily distracted and tired out. Difficulty focusing on one thing at a time.
- Frustration and anger can build when focus feels scattered and power feels blocked.

POSITION TAKEAWAY

May show up as tremendous rigidity of expression, with excitement about something but a need for guaranteed success before engaging, and insufficient power to take risks.

RECOMMENDATIONS

Working with the 6 — Creativity and Focused Will

- Healing helps release blocked anger and address addictive patterns. Cathartic release practices support this.
- Focus is key. Writing down all ideas and plans, then prioritizing just a few at a time, helps.
- Break chosen projects into manageable steps and use a simple list to track progress.
- Crossing off each completed step builds a sense of success and momentum toward the next one.
- Reviewing progress regularly helps maintain focus, especially near completion, when distraction tends to appear.
- Creative activities help unblock this energy.
- Keeping a diary supports the expression of soul desires that otherwise feel blocked.

6 The Word

The Word is a channelled message that shares a progressive story related to the dominant vibration(s) in your Soul Contract. It should be read aloud to help you ground their energies after you have read your contract in its entirety.

VUV - O, U, V, W - 6

You now have love, power, strength abundance, the ability to move and to act. With all my love I would not lead you into temptation, but, because I love you so, I will permit you to create your own temptations and then figure out how to get out of them. I will help you any time you are inextricably involved if you will call on me.

The important lesson for you to learn is that each lesson is of your own choosing. All avenues will be open to you. It is up to you to choose the one that is right for you. The choice is always between your will and mine.
